About Me

As a self-motivated individual, I continually expand my skillset and understanding of web development to create innovative solutions. My work is simple and functional. You can find me discovering inspiration through travel, culture, and photography.

Education

Pensacola Christian College
B.S., Visual Arts
Emphasis in Graphic Design
45 credit hours in
Computer Science

Certification Development

- **JavaScript** | Udemy Certification
  - Completed April 2022
  - Certificate of Completion
  - The Complete JavaScript Course 2022
- **Python** | Udemy Certification
  - Completion by July 2023
  - 100 Days of Code
  - Progress - GitHub Repository

Summary

Self-motivated developer with a background in programming and web development. Working to realign my career from production design to front-end development.

Accomplishments

- Developed two portfolio web applications during JavaScript certification course
  - Visit **Mapty** | track your workouts through geolocation API
  - Visit **Forkify** | find, bookmark, or create your recipes
- Built with Model-View-Controller architecture
- Worked with npm, Parcel, and Git CLI
- Studied JS object-oriented programming behind the scenes
- Manipulated the DOM API environment
- Achieved perfect Lighthouse optimization on portfolio site
